OUR MESSAGE

AMI Expeditionary Healthcare (AMI) and Constellis have a comprehensive approach to support federal, state, and local organizations in the execution of their COVID-19 vaccination efforts. Our plans are adaptable, flexible, and scalable and can be quickly implemented across a large geographic area.

As a trusted provider to the Department of Health and Human Services (HHS), AMI provided clinical support in the COVID crisis as early as February 2020 to Washington State and California. Since then our team has deployed thousands of clinicians, administrative and logistical personnel to support federal, state and county COVID-19 responses across the United States and the globe. Today we actively provide clinical support to multiple ongoing efforts for HHS, CDC, the Navajo Nation, and the States of Pennsylvania, California, Georgia, and Arizona. Globally we support COVID efforts for the WHO, the UN and several sovereign governments.

To further augment our capabilities, we strategically partner with Constellis who bring more than 50 years of experience providing emergency response and recovery services. Constellis delivers comprehensive recovery services to support COVID-19 response operations at all levels of government. No other companies of our size and stature have made such an impact in responding to this pandemic. Our vaccine services program ensures rapid compliant execution of state and federal COVID-19 vaccination plans.

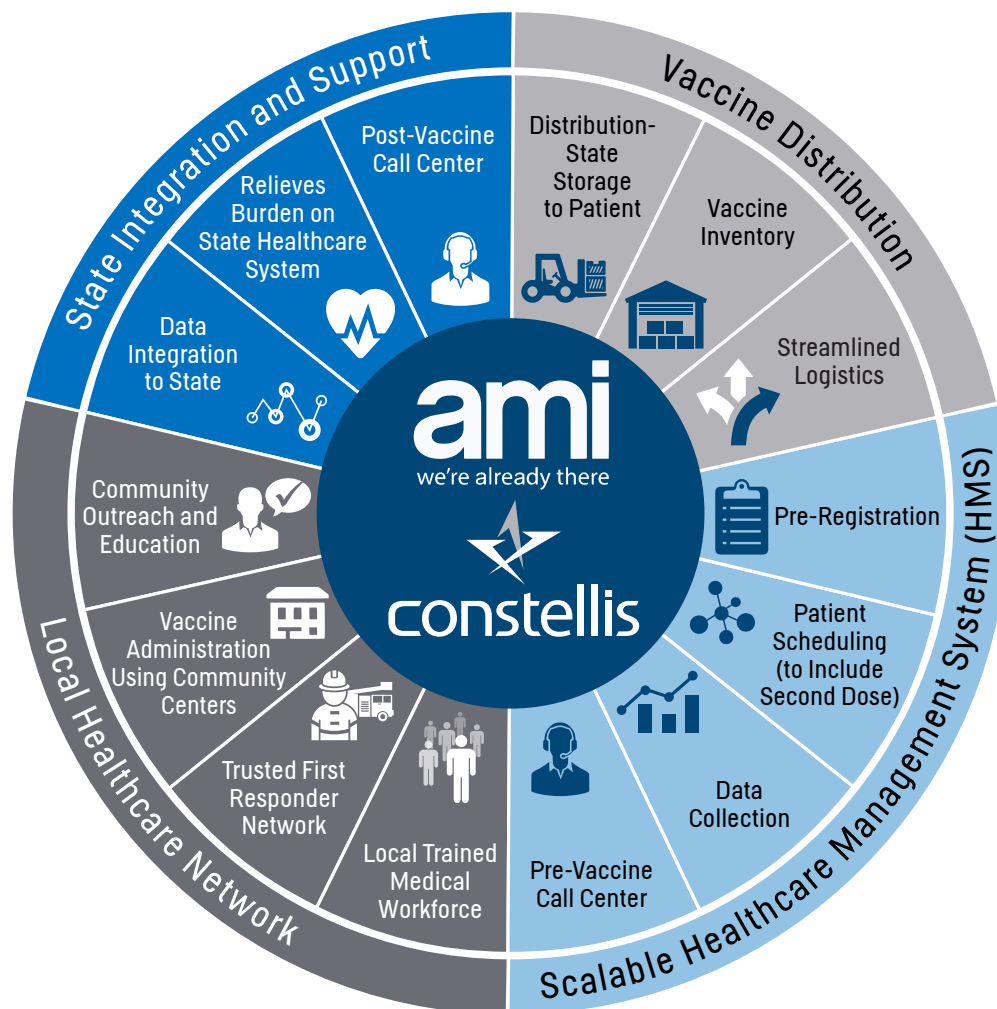

VACCINE DISTRIBUTION PROGRAM

Vaccine Implementation

The AMI and Constellis team has unparalleled experience in setting up clinical and emergency service operations for pandemic and disaster response in challenging environments. We developed a modular approach to vaccination clinic set up consisting of community-based, drive-thru and mobile clinics. Our modular systems are turn-key and include staffing, equipment and materials. Operational procedures can scale to accommodate surge as more vaccine becomes available.

Medical Information System

Our unique off-the-shelf suite of information management products is specifically tailored to maximize patient management and provide real-time information to state immunization record systems and can be quickly integrated into VTracks and Tiberius. Our system addresses all requirements needed to administer vaccine programs across states and counties and affords peace of mind through proven compliant systems. The system addresses second dose management and implementation through electronic and call center reminders.

OUR TEAM

Team	Competency
	World-class international healthcare provider with unparalleled experience in responding to global pandemics, including Ebola and COVID-19; ongoing COVID-19 response across the U.S., Caribbean and Africa for clinical services and mass testing.
	Integrated risk management leader and provider of essential mission support services to government and commercial clients worldwide. Has 22,000 employees and over 60 years experience responding to event driven contingency operations and recovery services for global disasters.
 Proven Healthcare Management System	System specifically designed to meet the challenges of COVID-19 vaccination services, using healthcare industry standards. Workflow includes end-to-end process for vaccine location, patient registration, scheduling, tracking, and reminder. Includes a reporting mechanism for the state, and call center support for registration, patient questions, and adverse reaction information. The system also provides a cloud based, HIPAA compliant insurance billing and collection component for optimum revenue cycle management (RCM).
 Global Supply Chain and Logistics	Our supply chain experts leverage global companies with existing infrastructure, processes, and capabilities; we provide a broad range of urgent transportation, time-sensitive shipments with optimized solutions. We can establish an independent supply chain to manage the vaccine distribution from ultra-cold storage to point of delivery (POD) sites.

MANAGEMENT AND DISTRIBUTION CAPABILITIES

AMI and Constellis know each state and county has its own requirements and program execution challenges. We have assembled a team that is unmatched in capability, capacity, and experience. By selecting our team, the customer will have a partner that can deliver a seamless solution from drug manufacturer to patient.

Program Management

AMI and Constellis senior staff have the experience and proven program management skills to successfully execute large complex vaccination programs across states and counties. Our team is well versed in collaboration and transparency to promote efficient communication and accelerate decision making across all agencies. Modular service solutions can be scaled to use resources effectively and efficiently. Cross team communication creates agile response to situational developments.

Supply Chain

Our robust independent supply chain quickly integrates into state vaccine planning and delivery logistics. Our expeditionary supply chain experts integrate existing infrastructure to handle vaccine allotments in any volume and delivery anywhere. Logistics personnel are trained in vaccine handling, inventory and ultra-cold storage and temperature monitoring. AMI and Constellis maintain a deep bench of trusted vendors for medical equipment and material and maintain stockpiles for reduced execution risk.

Cultural Competency

AMI and Constellis corporate culture has instilled across all levels of our workforce a sense of inclusion and respect for diverse demographics and under-served populations. Accommodations are made for multi-cultural and multi-lingual requirements by leveraging local assets and professional and technological translation and interpretation services. ADA requirements for access to services are well versed in cultural competency care.

Contracting Mechanisms

AMI and Constellis present the customer with alternative flexible contracting mechanisms to respond immediately to an ever-changing environment without giving up contractual and fiscal oversight. This contract structure was developed working with the states of Georgia, California, Arizona, Louisiana, Pennsylvania and the Navajo Nation and are in place and in use now.

PROVEN TEAM PERFORMANCE

Our team brings experience providing protective and emergency response measures from our comprehensive suite of services that range from rapid response solutions, emergency medical response, medical staffing program support, technical rescue, and emergency center operations, and logistics management throughout the world.

Department of Health and Human Services (HHS)

AMI is the sole private contractor in support of emergency services for the U.S. Department of Health and Human Services COVID-19 care missions which included clinical staffing, management and patient care for quarantine and isolation facilities, nursing homes, assisted living care sites, field clinics and testing sites. AMI fielded comprehensive clinical care teams and management support deploying more than 600 clinicians in less than 72 hours.

Atlanta, Georgia

Established within the Georgia World Congress Center in Atlanta in under 5 days, AMI is providing all clinical staffing and governance for a 200 bed COVID-19 field hospital. Patient acuities range from ICU step down monitored bed care through to routine COVID ward care.

County of San Mateo, California

AMI deployed in March of 2020 in response to COVID-19. AMI clinicians provided critical care support to the County's Alternate Care Sites and established and perfected a Medical Task Force Strike Team model that assessed, tested and stabilized outbreaks in skilled nursing facilities. Our Strike Teams assessed over 450 facilities and tested roughly 8,500 individuals. The Strike team model allows for the AMI teams to mobilize quickly and effectively in an ever changing health climate.

Navajo Nation

AMI currently performs a wide range of medical and administrative services for the Navajo Nation including 5 mobile test teams, 2 turnkey laboratories, an Alternate Care Facility a 5 quarantine/isolation wards at hotels and a triage/coordination call center. AMI recruited, on-boarded and deployed over 150 clinicians within 7 days upon contract including medical, administrative and logistical staff.

Commonwealth of Pennsylvania

AMI provides COVID-19 sample collection as part of statewide effort under the Department of Health. Under the Pennsylvania Approved COVID-19 Testing Sites (PaACTS) program, AMI established a Hub and Spoke network of approved testing sites within 6 regions. The network facilitates access for individuals to receive COVID-19 testing to rapidly detect and identify cases of COVID-19 infection.

Beth Israel Mount Sinai Medical Center

AMI was contracted to the Mt Sinai Beth Israel Hospital System in New York City to provide the clinical staffing and project management support to care for a 100 bed COVID-19 care ward which was delivered in under 7 days. Patient acuities ranged from ICU care and monitored beds through to routine medical ward care.

Federal Emergency Response

Constellis is a trusted provider delivering critical medical, fire and emergency services, and logistics support for the U.S. Government. For the last 20 years, Constellis has supported critical programs such as Fire Protection, Emergency Management and Emergency Medical Services for the U.S. Air Force as well as providing emergency and first responder services direct to the U.S. Department of Energy. We have also provided medical services to the U.S. Department of State under the Worldwide Protective Services contract since 2004.

Commercial COVID-19 Response

Constellis deployed ultraviolet (UVC) disinfection services in support of FOX Sports and NASCAR production trailers during major sporting events in 2020 to prevent the spread of COVID-19.
